# OUR HISTORY

**In 2000**, the first metal scrap processing facility was established in Samara Region; this was a starting point for the history of Akron Holding company

**Over the next 25 years** of sustainable growth we rose through the ranks from a metal scrap processor to one of the leading industrial, vertically integrated and diversified holding companies in the Russian Federation

## OVER THE COURSE OF THIS TIME:

scaled  
our business  
to 8 industri

built a network of metal  
scrap processing companies  
in 52 Russian regions  
with the territorial span  
from Kaliningrad  
to Khabarovsk

acquired  
over 30 industrial  
enterprises

grew a team  
of 22,000  
employees

Our holding group comprises companies in the metallurgical, oilfield service, mechanical engineering, cable and wiring, electrical engineering, trading, logistics, and polymer production industries. In addition, our holding group develops and promotes professional sports in Samara Region and is engaged in charitable activity

## OUR HOLDING COMPANY CONTINUES TO HOLD ITS LEADERSHIP POSITIONS

IN TERMS OF THE SCOPE OF PROCUREMENT AND  
PROCESSING OF FERROUS METAL- AND NONFERROUS  
METAL SCRAP IN THE TERRITORY OF THE RUSSIAN  
FEDERATION AND CIS COUNTRIES

Our holding companies are formed into a closed-loop processing and production chain: From procurement of raw materials to manufacture of finished products. It makes are agile and flexible in terms of pricing and production lead times, which compares us favorably with our competition.

The Akron Holding Group of Companies ensures constant quality control of production processes, compliance with environmental standards and respect for partners and employees. These principles allow the Holding not only to occupy a leading position in the market, but also to maintain a high business reputation.

# REGIONS OF OPERATION OF THE HOLDING COMPANY

About the  
Holding Company

The Akron Holding Group of Companies  
is one of the leading industrial multi-industry  
holdings of the full cycle in Russia

## AKRONECO

AkronEco is a set of environmental projects implemented by Akron Holding with the aim of organizing the collection and circulation of secondary raw materials of various fractions. The company is actively developing such areas as:

Extended Producer Responsibility (EPR) Program

Implementation of the project to create and expand a federal network of centers for recycling waste electrical and electronic equipment (WEEE)

Participation in the MegaBak project, development of own networks of collection points for recyclable materials from the population - «Ecoboxes»

## OUR SERVICES:

Disposal of household appliances, industrial equipment, office equipment, tools, network equipment, medical equipment, marketing equipment, textile products

AutoForecycling and recycling of all types of transport

Reception of secondary raw materials from the population through the points "Ecobox" and "MAGABAK"

Metal structure dismantling services

Comprehensive services for enterprises in the field of ecology and recycling

Secure data destruction

Petromax, Vtoraluminprodukt, Eco Alliance

Recycling of waste lead-acid batteries

of Regions, 2023/24  
Russian Cup**

**Our achievements by area:**

Akron – Konoplev Football Academy  
Akron-2 FC  
Akron Football School Akron Fighters

## AKRON FOOTBALL SCHOOL

In 2011, Akron children's football club was established in the village of Novosemeykino in Samara Region. The project was conceived with the aim of developing children's and youth sports in the region and promoting healthy lifestyle. Under the guidance of experienced and qualified coaching staff more than 300 children aged 5 to 16 from Novosemeykino, Tolyatti and Zhigulyovsk constantly train at the Akron football school.

This is where children get the opportunity to evolve and mature. The football school is equipped with an advanced football pitch which is open to the young footballers all year round. The teams of Akron Football School successfully score in all-Russian, regional, and city-level tournaments.

## AKRON FC

Akron Football Club which was founded in the spring of 2018 will be representing the City of Tolyatti and the Samara Region in 2024/25 season in the Russian Premier League, the main tournament of domestic football. The team will play its home matches in the upcoming season at Solidarnost Samara Arena Stadium in the City of Samara. Over the six years of its existence Akron FC has secured the status of one of the brightest regional football clubs, capable of surprising on and off the pitch. In May 2022 FC Akron joined the management structure of the Konoplev Academy as a founder. In addition to performance of its trainees at all-Russian competitions, Akron- Konoplev Academy

is represented by three teams in the Youth Football League tournaments and a team in the Youth Football League. A constructive dialogue between Akron Holding Group and the Government of Samara Region via concession mechanism made it possible to enter into an agreement according to there is work underway to rebuild the existing infrastructure and to build new sports facilities, as well as to introduce a new effective strategy for training young footballers, which will not only improve the quality of the training process but also ensure a smooth transition of the school trainees to professional football.

## AKRON-KONOPLEV FOOTBALL ACADEMY

Autonomous Nonprofit Organization Akron-Yuri Konoplev Football Academy is a training center located in the City of Tolyatti. This Academy is engaged in attracting and training young football players from all over Russia. The educational institution has at its disposal an indoor arena, pitches with artificial turf, natural grass, an aerobics and gymnastics room, gym, special football training class, as well as medical diagnostics and rehabilitation centers. The Academy has been in operation since 2003.

Over 250 athletes aged 8 to 19, including 30 girls, undergo a sports training course at Akron-Konoplev Academy. Upon reaching the age of 13 the football players have the opportunity not only to participate in the training process but to enroll in a regular school and reside at the premises of the Academy. The 'Academicians' have repeatedly become prize winners and interregional, all-Russian and international tournaments. At the 2018 FIFA World Cup three Academy alumni defended the honor of Russia (Dzagoev, Zobnin, and Kutepov).

Akron has been systematically building a multi-stage system for training football players, at the core of which are children's teams in Zhigulyovsk, Novosemeykino and Tolyatti-based schools. The next step is Akron-Konoplev Academy, which includes teams of the Youth Football League and the Youth Football League. In order to transition to professional football in 2023 the second team Akron-2 was formed; it was assigned to the Second League B. The Academy alumni are among the team players.

# AKRON FIGHTERS

## JFC PRIDE

### OUR ACHIEVEMENTS

JFC PRIDE team released an 8- episode show titled 'Become an MMA Star' on the Federal Sports TV Channel Udar.

A sports camp was set up at Leonid Tyagachev Ski Club with the participation of over 60 athletes aged 12 to 22.

In association with the Russian MMA Union the first visiting all-Russian qualifying MMA tournament was arranged in the City of Smolensk. It was attended by 350 children aged 12 to 16. Akron Fighters team was formed; it comprised participants and winners of the Become MMA Star show, JFC PRIDE winners, as well as a number of young yet active professional athletes.

Long-term contracts have been signed with several promising young MMA fighters.

In 2019, JFC PRIDE was founded.

As of now it is the only MMA promotion company in the world for juniors. The key objective of JFC PRIDE is to identify future stars of the industry at the earliest stages of their career. A complex system of athlete selection was developed with this in mind.

The best of the best – based on the results of such selections – joint the AKRON FIGHTERS team which in turn performs well at professional MMA matches and tournaments.

AKRON FIGHTERS athletes reside at a dedicated training camp which is fully sponsored by Akron industrial holding company.

AKRON FIGHTERS training camp is equipped with everything an athlete may require for proper training and development. The best sports doctors, trainers, psychologists and even teachers who develop their English language skills, public speaking and basic sciences are available to athletes 24/7.

# POLINA

## CHARITY FUND

Preserving Present and Creating the Future

## ESTABLISHED IN 2011

Polina Charity Fund was formed with the goal of supporting people needing help and medical assistance across the entire country. The core mission of the Fund is to help children with cancer diseases and over 80% of the Fund's resources are allocated to such assistance.

The Fund also helps purchase medical equipment required by the relevant healthcare institutions, as well

as repairs and purchases furniture and accessories for orphanages and residential care facilities.

In 2023 Polina Charity Fund helped **74 children**, which includes installation of prosthetics to children with congenital limb defects.

The amount of financial assistance to oncology child patients and child patients with other severe diseases was **RUB 13.3 million**

## SPECIAL PROJECTS BY THE CHARITY FUND:

### BRAVERY BOX

Collection of toys and children's books for children undergoing long-term oncological therapy

### DONOR DAY

Twice a year on a centralized basis the Holding employees donate their blood

### Tender Hearts

We support multi-child families by improving their living standards

### Children's Day

Setting up festivities for the alumni of our sponsored orphanages

Activities performed by Polina Charity Fund are integral part of the corporate culture of Akron Holding Group and they help engage our emphatic employees in doing charitable acts and assisting those in need
