*IN THE PROCUREMENT
AND PROCESSING OF FERROUS
AND NON-FERROUS METAL SCRAP
IN THE RUSSIAN FEDERATION
AND CIS COUNTRIES*

The Holding's enterprises are integrated into a closed-loop production chain: from raw material procurement to the manufacture of finished products. This gives us flexibility in pricing and production lead times, setting us apart from competitors.

Akron Holding Group ensures continuous control over the quality of production processes, compliance with environmental standards, and a respectful approach to partners and employees. These principles enable the Holding not only to maintain leading market positions, but also to uphold a strong business reputation.

OUR MISSION

**TO PROVIDE RESPONSIBLE
AND INNOVATIVE WASTE
MANAGEMENT SOLUTIONS**

akron-eco.ru

EXTENDED PRODUCER RESPONSIBILITY

Akron Ecology provides recycling services under extended producer responsibility. We collect and recycle end-of-life equipment and packaging on behalf of the client enterprise using our own resources.

Extended Producer Responsibility (EPR) is an economic regulatory mechanism under which producers and importers of goods are required to recycle products manufactured or imported into the country after they lose their consumer properties. In Russia, EPR is regulated by Federal Law No. 89-FZ "On Production and Consumption Waste" dated June 24, 1998.

We will fulfill the recycling standard for you by organizing the collection and recycling of similar goods in the required volume
